

THE HEAVY DUTY BRUSKE STREET SWEEP™

Here's the toughest brush to hit the street! The Heavy Duty Bruske Street Sweep™ makes all other conventional sweeping tools things of the past. This brush is revolutionizing the entire industry. For the very first time you can get a brush that is made to last and is available for comparable cost or even less than traditional brushes.

The Heavy Duty Bruske Street Sweep keeps on sweeping... up to five times longer than any other outdoor brush. Why? Because its stiff, coarse, durable synthetic bristles will not break or thin out as they do in commonly used bass fiber brushes. Bruske Street Sweep's bristle material keeps its fullness, its shape, and never sags or mats.

HARDWOOD HEAVY DUTY ORANGE BRUSKE STREET SWEEP... is made with stiff, coarse, non-sagging durable synthetic bristles for use on rough road and concrete surfaces under any adverse conditions: dry, wet, oily or greasy. This brush is the best of the road and street brushes, or construction brushes.

Order #6031 60" wood or #6131 steel handles separately.
