

THE ARMOUR-PLATED BRUSKE BRUSH™

The Armour-Plated Bruske Brush™ is a unique floor sweep developed specifically out of a growing need for floor brushes used in unusual situations. It is adapted for use in applications where a lightweight shovel or scoop might ordinarily be needed. These Armour-Plated Bruske Brushes share the same special blend of synthetic bristles featured in the indestructible Bruske Brush. This provides for smooth sweeping action and for long bristle life. Added to this unique super-strong brush is the special strength, heavy gauge, all metal frame that makes this brush as durable as a shovel. It's available in two convenient sizes and in a choice of bristles to meet almost every need.

With this special item, we suggest that you order #5031 hardwood handles. Please order handle separately.
